

DESADV message	Explanation
UNB+UNOA:2+xxxxxxxxxxxx:14+8717045000002:14+180710:1104+6116823385'	
UNH+6116823385+DESADV: D:01B :UN:EAN007'	DESDADV version should be EDIFACT D.01B/level 4.
BGM+351+ 365270 +9'	Number of the delivery note
DTM+137: 201807101056 :203'	Message date and -time
DTM+2: 201807112200 :203'	Delivery date and -time. It is also allowed to use DTM+17 or DTM+63/DTM+64
RFF+ON: 6116823385 '	Jumbo ordernumber
RFF+ZZZ: EANNL4'	DESDADV version should be EDIFACT D.01B/level 4.
NAD+SU+ 1234567890123 ::9'	GLN supplier. The NAD segments from the ORDERS must always be copied 1 to 1 in the messages that are returned
NAD+BY+ 1234567890123 ::9'	GLN buyer (=store). The NAD segments from the ORDERS must always be copied 1 to 1 in the messages that are returned
NAD+DP+ 1234567890123 ::9'	GLN delivery address (=DC). The NAD segments from the ORDERS must always be copied 1 to 1 in the messages that are returned
NAD+UC+ 1234567890123 ::9'	GLN ultimate consignee (=store). The NAD segments from the ORDERS must always be copied 1 to 1 in the messages that are returned
CPS+1'	
CPS+2+1'	Load carrier 1
PAC+1'	Number of load carriers=1. 1 SSCC label per load carrier
PCI+17'	
GIN+SRV+ 8716532001171 '	GTIN of the load carrier on wich will be delivered. See https://www.gs1.nl/kennisbank/gs1-data-source/levensmiddelen-drogisterij/codelijsten/codes-voor-emballage/ for the codes prescribed by GS1.
PCI+33E'	
GIN+BJ+ 387142311459869740 '	SSCC labelnumber. Should contain exactly 18 digits.
PAC+ 5 '	Number of crates supplied.
PCI+17'	
GIN+SRV+ 8714303000019 '	GTIN of the crate. See https://www.gs1.nl/kennisbank/gs1-data-source/levensmiddelen-drogisterij/codelijsten/codes-voor-emballage/ for the codes prescribed by GS1.
LIN+1++ 8714303000019 :SRV'	GTIN of the crates. This rule must be omitted for article-related packaging
QTY+12: 5 '	Number of crates supplied.
LIN+2++ 1234567890123 :SRV'	GTIN article (trade unit). Each 'LIN' must have a number higher than the previous one.
PIA+1+160519:NB'	Batch number, this segment is not required.
QTY+12: 2 '	Quantity in trade units eg box or crate.
PCI+17'	
DTM+361: 20190516 :102'	Best before date is a mandatory segment if there is a best before date or a do not use after date on the packaging for the consumer.
LIN+3++ 1234567890123 :SRV'	GTIN article (trade unit). Each 'LIN' must have a number higher than the previous one.
PIA+1+ 040619 :NB'	Batch number, this segment is not required.
QTY+12: 1 '	Quantity in trade units eg box or crate.
PCI+17'	
DTM+361: 20190604 :102'	Best before date is a mandatory segment if there is a best before date or a do not use after date on the packaging for the consumer.
LIN+4++1234567890123:SRV'	
PIA+1+050819:NB'	
QTY+12:1'	
PCI+17'	
DTM+361:20190518:102'	
LIN+5++1234567890123:SRV'	
PIA+1+300519:NB'	

QTY+12:1'	
PCI+17'	
DTM+361:20190530:102'	
LIN+6++1234567890123:SRV'	
PIA+1+130619:NB'	
QTY+12:1'	
PCI+17'	
DTM+361:20190613:102'	
UNT+48+6116823385'	
UNZ+1+6116823385'	

Explanation

CPS+2+1'	Numbering of the delivered load carriers. If 1 order does not fit on 1 load carrier, add a new CPS with also a unique SSCC label number.
LIN+1 ++0662510000033:SRV'	Numbering of the article lines. Each LIN must have a higher number than the previous one.
